

Hello,

My name is William Marcinkowski, a graduate of the class of 2015 from Ancillae-Assumpta Academy. I am a Boy Scout and am currently working toward obtaining the rank of Eagle Scout. To obtain this rank, every scout has to complete a service project in their community. When thinking of benefactors for this achievement, I quickly thought of the Ancillae-Assumpta Academy.

Three years ago, my brother Walter, class of 2013

constructed four garden boxes for his Eagle Scout Service Project. These gardens were to be used to help in teaching students about environmental science. Since then, these boxes have been used to supply school with fresh vegetables to be used in the cafeteria. Ancillae has been having problems with a groundhog getting into the gardens and eating all the harvest that has been growing. For my Eagle Scout Service Project, I was tasked with finding a solution to this problem. After much research, I have concluded that the most effective and humane way to put a stop to this problem would be to construct a fence that is partially trenched in the ground to deter the animal. This fence will also give the students more room to work around the garden boxes because there is little room with the current fence that stands today.

A fence like this is not cheap which is my purpose for writing to you. I estimate the total cost of this fence would be \$1,700.00. For this project to be completed, we need help from the school community to help fund this.

If you would like to donate, you can proceed to click the donation link, or send a check to AAA Eagle Scout Project. If you will be attending any night of the Spring Show, I will be in the lobby accepting cash or check donations.

Thank you for your continuing support to better the AAA community.

-William Marcinkowski
